Native UHD tensile trajectory: 16/16 affine subsets, explicit median
Historical prototypes and final fixed B-spline profiles; timing includes system variability
Acceptance does not establish accuracy
Fixed support accepted (%)
Frame
Baseline
Adaptive prototype
Fixed cubic prototype
Final: fine stop k=3
Final: fine stop k=1
Displacement error on accepted fixed support
RMSE (px)
Frame
Four affine-gradient component errors
Aggregate gradient RMSE
Frame
One-slot p95: every repetition retained
NumPy-to-field age (ms)
Baseline
Adaptive prototype
Fixed cubic prototype
Final: fine stop k=3
Final: fine stop k=1
